Sorry, saw a mistake in that version. Please review the draft below. Thanks

EPA has released the results of groundwater testing near a large dairy in Juneau County. EPA's tests – and others conducted by the county health department -- found elevated levels of nitrates. Region 5 continues to work with Wisconsin DNR to evaluate the results and determine appropriate next steps. Both agencies will attend a county-sponsored public meeting on Tuesday, July 17. For more information, including the testing results: (-----
--NEED TO INSERT LINK ON MONDAY-----)
